  Project Description: I have developed a full-fledged Online Car Service Platform using MERN stack, aiming to transform how car owners handle their vehicle servicing. Offering diverse services, it simplifies the car service process, accessible from any internet-connected device.

  Roles and Responsibilities:
  - Responsible for implementing user, admin, service-centers and employee **authentication and authorization**, ensuring secure access and data management using JWT for the Online Car Service Platform.
  - Involved in managing **email communication**, including notifications, verification and templates for the Online Car Service Platform.
  - Responsible for **location management**, integrating geolocation services and enabling location-based features for the Online Car Service Platform.
  - In charge of **database management** for the Online Car Service Platform.

- **Company:** Truquest Infotech, India
  Duration: Jun 2023 – Sep 2023
  Role in the Project: MERN Stack Developer
  Technologies: Node JS, Express JS, React JS
  IDE/Tools: Visual Studio, Postman
  Operating Systems: Windows 10

  Project Description: Successfully delivered a real-time gold e-commerce platform with minute-to-minute gold rate updates, enhancing user access to up-to-the-minute pricing information for informed gold transactions.

  Roles and Responsibilities:
  - Led development and deployment of real-time gold e-commerce platform.
  - Implemented secure user, admin, and vendor authentication with JWT.
  - Managed email communication for enhanced user engagement.
  - Developed language change option for inclusive user experience.

- **Company:** Truquest Infotech, India
  Duration: Feb 2023 – May 2023
  Role in the Project: Java Developer
  Technologies: Java
  IDE/Tools: Eclipse

Operating Systems: Windows 10
Project Description: Successfully delivered a comprehensive Company-wise employee management and chat web application, streamlining internal communication and employee information management across the organization.
Roles and Responsibilities:
• Led development of a Java desktop app for LAN-based employee management.
• Implemented secure user authentication and authorization.
• Integrated real-time chat for employee collaboration.
• Designed intuitive UI for efficient navigation.
• Ensured data security with encryption and access controls.
• Conducted regular testing and updates for reliability.
